WORK EXPERIENCE

Full Stack Developer

Cimpress India

08/2022 - Present

India

Cimpress is a global e-commerce company specializing in customized marketing products and services for businesses and consumers.

Achievements/Tasks

- Achieved a **75% reduction** in service **response** time by implementing diverse **caching strategies** (Redis and CloudFront). Improved another service **by 20%** through strategic **codebase enhancements** while increasing the ability to handle a **10x load**.
- Enabled seamless service migration through **MicroFrontend** implementation for dynamic and seamless package deployment.
- Collaborated on **internal open-source** projects, including a **React UI component library** and an Express framework.
- Engineered applications like **claims management**, overseeing \$700K in orders. Enhanced Fulfilment-Expectation service to add new capabilities like COD, integral to **order flow** consumption.
- Introduced a production time and delay service, enhancing delivery estimates through **collaborative** efforts **across teams**.
- **Migrated** services seamlessly, maintaining live **data integrity** for Capacity, Production Time, and Fulfiller Settings.
- **Guided** and **mentored** two team members, supporting professional development and fostering a collaborative work environment.
- **Won** an internal **hackathon** by introducing the use of LLM, presenting an expanded set of design patterns for customers.

Frontend Engineer (Contract Worker)

Battle Brain

06/2022 - 08/2022

India

EdTech Platform around Crypto.

Achievements/Tasks

- Developed a **forum resource** for seamless integration with different website sections, facilitating discussions and comments.
- Executed thorough testing with comprehensive test cases, utilizing Jest for both **Unit** and **Integration testing** to ensure the highest quality standards.
- Migrated services from Express to NestJS, ensuring adherence to **RFC standards for REST API**, thereby streamlining management and paving the way for potential future enhancements.
- Integrated **Discord and email notification** using NOVU, to enhance communication channels for improved engagement and efficiency.

EDUCATION

B.E of Computer Engineering

Dwarkadas Jivanlal Sanghvi College of Engineering

08/2018 - 06/2022

9.4/10

PERSONAL PROJECTS

Expense Manager (04/2023) [🔗](#)

- Created a user-friendly web app for tracking personal and business expenses, with a focus on frontend features like transactions, categories, and recurring transactions.
- Presented valuable insights through various visual representations, facilitating better financial management and informed decision-making for users.

Shortest Path Visualisation (08/2020) [🔗](#)

- Visualized Dijkstra's Algorithm on a (10x10) grid with start and end points, including blocked cells, to find the optimal path without accessing the blocked cells.
